

Community Health Assessment 2025

City of Cheviot

The WeTHRIVE!SM Community Health Assessments (CHA) paint a comprehensive picture of the community's current and past health status, factors contributing to higher health risks and poorer health outcomes, needs in the community, and community resources available to improve health.

The WeTHRIVE! CHA helps aid community partners, stakeholders and residents in identifying priority health issues, developing goals, and selecting strategies to improve residents' health. The data comes from multiple sources, including surveys, surveillance systems and landscape reviews (see data notes QR code). Using multiple data sources allows for a comprehensive picture of the health of the community. The Hamilton County CHA released in 2025 provides an overview of the health of Hamilton County, while the WeTHRIVE! CHA allows WeTHRIVE! teams to take a deeper dive into their community-specific data.

This report includes the following topics relevant to health and wellness of residents within the community:

- Community Context (who makes up your community)
- Healthcare and Health Outcomes
- Economic Stability
- Neighborhood and Built Environment
- Assets and Opportunities
- Recommendations

"Public health in Hamilton County means working together to ensure that all of our residents have the opportunity to thrive both individually and collectively. When people are healthy, they can lead fuller, happier lives while also contributing to the local economy and culture."

-Greg Kesterman, Hamilton County Public Health, Health Commissioner

The WeTHRIVE! initiative of Hamilton County Public Health is a paradigm shift that engages communities, and schools and child care providers to make meaningful and sustainable policy, environmental, and system changes where people live, work, learn, and play, ensuring that all individuals have the opportunity to thrive. The WeTHRIVE! initiative works to create a culture of health, safety, and vitality throughout Hamilton County. The four pillars of WeTHRIVE! are:

SUPPORT

WeTHRIVE! Population Health Specialists help start a team, offer assistance, and connect the teams to resources.

DATA

The most up-to-date public health data is shared to help determine areas of need and plan for the future.

COLLABORATION

The WeTHRIVE! initiative fosters a culture of collaboration by bringing together child care providers, communities, schools, and <u>partner</u> organizations.

RECOGNITION & CELEBRATION

The initiative is all about celebrating the positive progress and changes our amazing teams work so hard to implement.

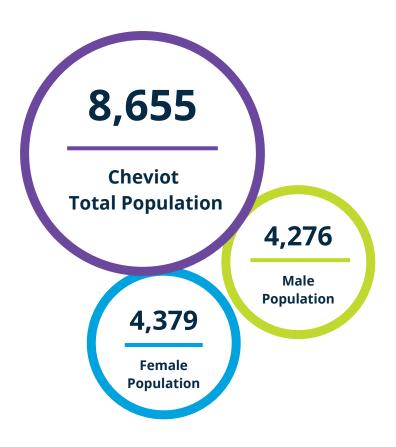

As part of data provided to WeTHRIVE! communities, the WeTHRIVE! CHAs are completed every three years to provide an opportunity to take a deeper dive into the annual WeTHRIVE! Data Profiles that are shared with each active WeTHRIVE! community. The WeTHRIVE! CHAs are developed by the Health Promotion & Education and Epidemiology divisions at Hamilton County Public Health. The Epidemiology division reviews and analyzes a variety of data sources that include health, social, economic, and environmental indicators to help paint a picture of the health and wellbeing of a community. To expand on data, the Health Promotion and Education division works with WeTHRIVE! teams to provide community context and lived experiences through the WeTHRIVE! Landscape Review. The WeTHRIVE! Landscape Review looks at community conditions and resources related to the WeTHRIVE! pathways that impact residents overall health by driving/walking around the community to get a visual representation of the community. Together, data is compiled into a list of assets, opportunities, and recommendations that are specific to each community to provide team members with the actionable strategies to promote the health of all residents.

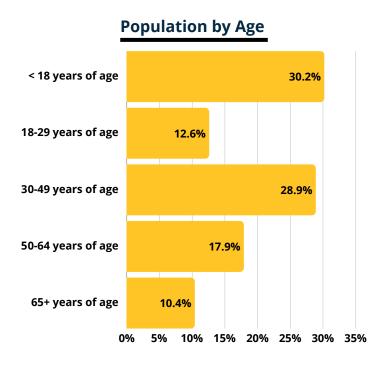

Community Context, 2023

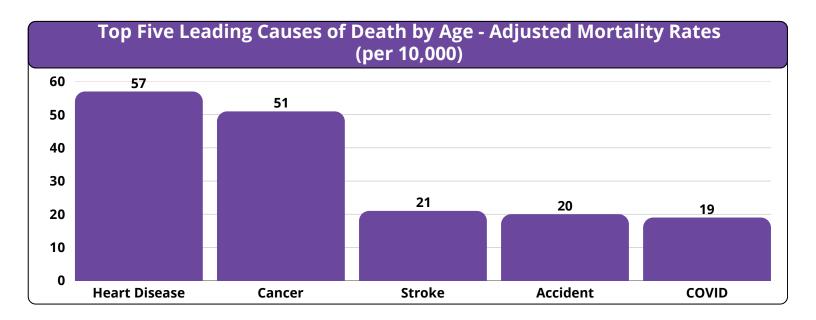

To effectively enhance health outcomes, it's important to comprehend the context in which these issues arise. Understanding the community context is a foundational and vital step in promoting positive health within a community. In this report, community context encompasses population demographics, including age, gender, and race/ethnicity.

non-Hispanic White non-Hispanic Black non-Hispanic Multi Racial non-Hispanic Other Race Hispanic, Any Race 4.8% 4.8%

Healthcare and Health Outcomes: 2019 - 2023

Access to quality healthcare is a major component of increasing quality of life for all people. Barriers to healthcare, such as gaps in health insurance coverage, can delay access to preventative services that can lead to preventable disease and premature death. There are a variety of metrics we can look at to measure the overall health of a community such as mortality rates, uninsured rates, rates of infectious disease, and more. All of these metrics allow us to gain a better understanding of the health needs of the community.

Child Fatality Rate (per 1,000)

0.2 *

Infant Mortality Rate (per 1,000)

1.7 +

Average Life Expectancy

69.8

Independent Living Difficulty

4.6%

Total population with an independent living difficulty, 2023

Asthma Related Emergency Department Visits, 2023*

Naloxone Kits Distributed*

= less than 20 cases. Please see data notes at end of report for more information on the significance of small numbers.

The economic stability of individuals within a community can have a lasting impact on the overall health of that community. Economic stability means that individuals have sufficient and reliable income to pay for expenses such as healthcare. Lack of economic resources makes it more difficult for an individual to access healthcare and sustain healthy behaviors. There are a variety of metrics to look at that can measure the overall economic stability of a community such as unemployment rates, household income, rates of households receiving public benefits, and more.

Population 16 and Older Unemployed

Poverty

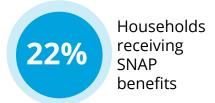

Children living in poverty

Housing

54% Owner - occupied housing

46% Renter - owned housing

Income

\$54,654Median household

income

\$28,483

Per capita income

Housing Characteristics

Residents experiencing a housing cost burden

Households with no vehicle available

Neighborhood & **Built Environment, 2023**

The built environment is the man-made space where individuals live, work, and play on a day-to-day basis. This includes buildings, parks, sidewalks, streets, public transportation and other spaces that have been created or modified. It can affect the potential for injuries related to pedestrian and motor vehicle crashes. It can also affect an individual's access to healthy food, recreation opportunities and clean, safe places to work and play.

Motor Vehicle Crashes

Motor vehicle crashes involving a 1.3% pedestrian or bicyclist lacktrian

Motor vehicle crashes involving 16% a child or teenager

4.0% Motor vehicle crashes involving drugs or alcohol

0.0% Fatal motor vehicle crashes

Lead Exposure

Children aged 5 and under with an elevated blood lead 93% level, 2019 - 2023

Housing built prior to 1979

Built Environment

Ground 49% surface that is green space

Most Walkable

Food Access

Population lowincome and over 8.3% a mile from supermarket, 2019

Stores that accept SNAP benefits

91%

Households with internet access

Youth 16-19 3% who are working nor in school

Assets & Opportunities

- Cheviot has designated walking paths, playgrounds, and a large park providing residents various opportunities to be physically active.
- There are multiple opportunities and systems encouraging social connectedness, including the many community-wide events held throughout the year.
- Cheviot has three designated Safe Place locations in the community displaying the Safe Place sign, the universal symbol of youth safety if they are in crisis.
- There are safety programs available for Cheviot residents to participate in, such as swim classes, CPR/AED/First Aid classes, and a child car seat inspection program.
- There are many opportunities for residents to join community organizations through local church groups, neighborhood associations, and various arts and cultural organizations.
- There are limited outdoor areas in Cheviot that are designated as smoke-free or tobacco-free.
- There are no recycling cans available at Harvest Home Park in Cheviot.
- Overall, Cheviot sees higher rates of sexually transmitted infections. The rate of gonorrhea is 2.2 times higher and the rate of chlamydia is 1.8 times higher compared to other cities and townships in Hamilton County.
- The percentage of children below the age of five in Cheviot with elevated blood lead levels is 3.3 times higher than other cities and townships in Hamilton County.
- The rate at which Cheviot residents die from an overdose is 2.2 times higher than other cities and townships in Hamilton County.

Recommendations

The following recommendations are based on the assets and opportunities identified for your community. The corresponding WeTHRIVE! pathway or pathways for each recommendation are indicated to the right of each recommendation.

= Injury Prevention Pathway

🦚 = Environmental Health Pathway

★ = Harm Reduction Pathway

1 = Emergency Preparedness Pathway

🦍 = Social Health Pathway

Recommendations	WeTHRIVE! Pathway
Protect young lungs at play by working with Hamilton County Public Health or the American Heart Association to create policy around smoke-free or tobacco-free playgrounds or other outdoor community spaces owned by Cheviot.	
Partner with Hamilton County ReSource to place recycling cans next to the trash cans at Harvest Home Park in Cheviot.	
Partner with Hamilton County Public Health Disease Prevention Department to identify resources for residents around safe-sex practices and sexual transmited infection testing.	6
Partner with Hamilton County Waste Management to educate residents on available resources that address lead hazards, specifically in homes that were built before 1979 and share financial resources available for families.	
Partner with Hamilton County Public Health's Harm Reduction Division to distribute harm reduction supplies, such as naloxone and fentanyl test strips, in local businesses and community gathering spaces to help prevent overdoses, reduce harm, and increase awareness of substance use safety.	€ ₩
