

Community Health Assessment 2025

Village of Cleves

Introduction

The WeTHRIVE!SM Community Health Assessments (CHA) paint a comprehensive picture of the community's current and past health status, factors contributing to higher health risks and poorer health outcomes, needs in the community, and community resources available to improve health.

The WeTHRIVE! CHA helps aid community partners, stakeholders and residents in identifying priority health issues, developing goals, and selecting strategies to improve residents' health. The data comes from multiple sources, including surveys, surveillance systems and landscape reviews (see data notes QR code). Using multiple data sources allows for a comprehensive picture of the health of the community. The Hamilton County CHA released in 2025 provides an overview of the health of Hamilton County, while the WeTHRIVE! CHA allows WeTHRIVE! teams to take a deeper dive into their community-specific data.

This report includes the following topics relevant to health and wellness of residents within the community:

- Community Context (who makes up your community)
- Healthcare and Health Outcomes
- Economic Stability
- Neighborhood and Built Environment
- Assets and Opportunities
- Recommendations

"Public health in Hamilton County means working together to ensure that all of our residents have the opportunity to thrive both individually and collectively. When people are healthy, they can lead fuller, happier lives while also contributing to the local economy and culture."

-Greg Kesterman, Hamilton County Public Health, Health Commissioner

WeTHRIVE! Overview

The WeTHRIVE! initiative of Hamilton County Public Health is a paradigm shift that engages communities, and schools and child care providers to make meaningful and sustainable policy, environmental, and system changes where people live, work, learn, and play, ensuring that all individuals have the opportunity to thrive. The WeTHRIVE! initiative works to create a culture of health, safety, and vitality throughout Hamilton County. The four pillars of WeTHRIVE! are:

SUPPORT

WeTHRIVE! Population Health Specialists help start a team, offer assistance, and connect the teams to resources.

DATA

The most up-to-date public health [data](#) is shared to help determine areas of need and plan for the future.

COLLABORATION

The WeTHRIVE! initiative fosters a culture of collaboration by bringing together child care providers, communities, schools, and [partner organizations](#).

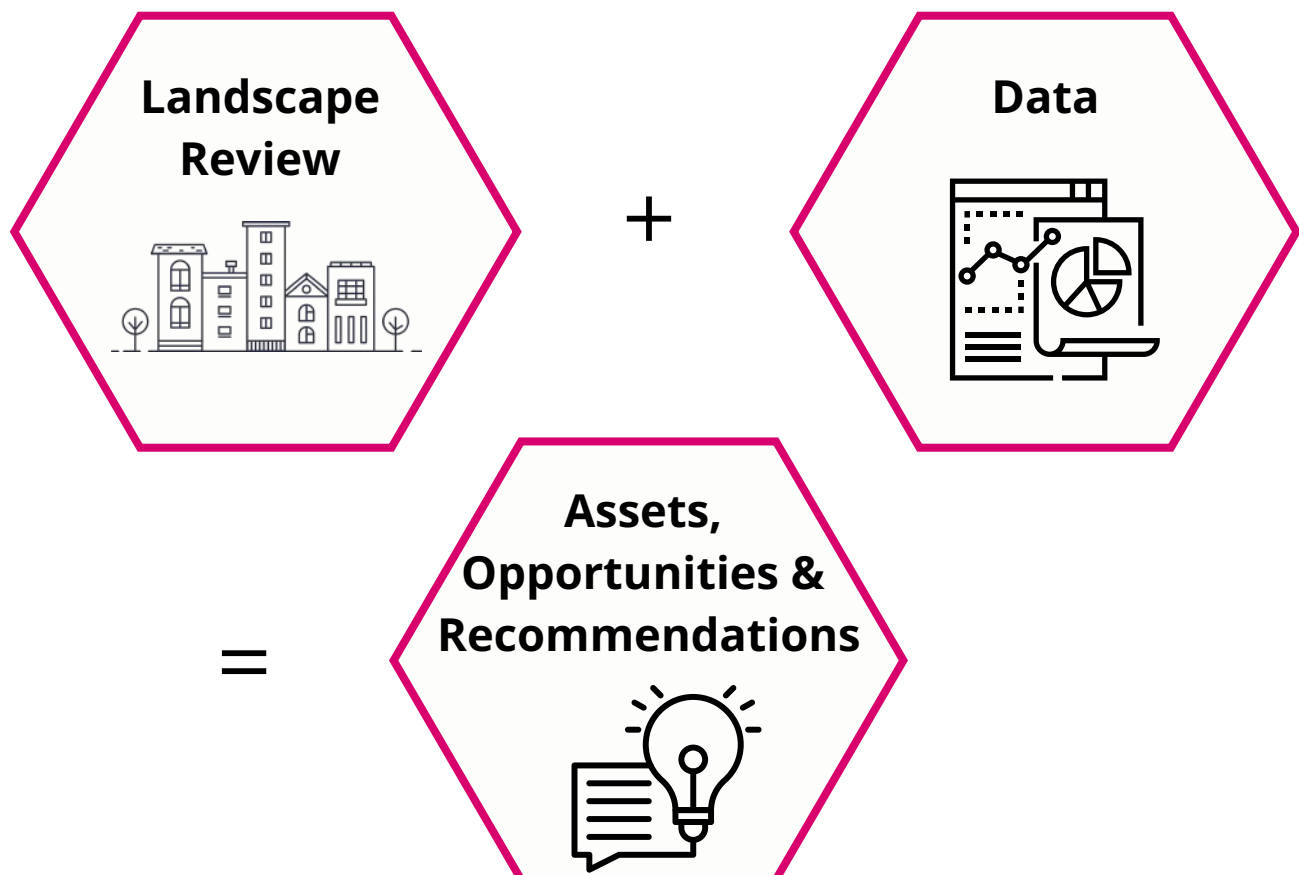

RECOGNITION & CELEBRATION

The initiative is all about celebrating the positive progress and changes our amazing teams work so hard to implement.

We
THRIVE!
Community Wellness in Action™

WeTHRIVE! CHA Process

As part of data provided to WeTHRIVE! communities, the WeTHRIVE! CHAs are completed every three years to provide an opportunity to take a deeper dive into the annual WeTHRIVE! Data Profiles that are shared with each active WeTHRIVE! community. The WeTHRIVE! CHAs are developed by the Health Promotion & Education and Epidemiology divisions at Hamilton County Public Health. The Epidemiology division reviews and analyzes a variety of data sources that include health, social, economic, and environmental indicators to help paint a picture of the health and wellbeing of a community. To expand on data, the Health Promotion and Education division works with WeTHRIVE! teams to provide community context and lived experiences through the WeTHRIVE! Landscape Review. The WeTHRIVE! Landscape Review looks at community conditions and resources related to the WeTHRIVE! pathways that impact residents overall health by driving/walking around the community to get a visual representation of the community. Together, data is compiled into a list of assets, opportunities, and recommendations that are specific to each community to provide team members with the actionable strategies to promote the health of all residents.

Community Context , 2023

To effectively enhance health outcomes, it's important to comprehend the context in which these issues arise. Understanding the community context is a foundational and vital step in promoting positive health within a community. In this report, community context encompasses population demographics, including age, gender, and race/ethnicity.

Population by Age

Population by Race/Ethnicity

Healthcare and Health Outcomes : 2019 - 2023

Access to quality healthcare is a major component of increasing quality of life for all people. Barriers to healthcare, such as gaps in health insurance coverage, can delay access to preventative services that can lead to preventable disease and premature death. There are a variety of metrics we can look at to measure the overall health of a community such as mortality rates, uninsured rates, rates of infectious disease, and more. All of these metrics allow us to gain a better understanding of the health needs of the community.

Top Five Leading Causes of Death by Age - Adjusted Mortality Rates (per 1,000)

Child Fatality Rate (per 1,000)

0.4 ♦

Infant Mortality Rate (per 1,000)

5.9 ♦

Average Life Expectancy

72.5

Independent Living Difficulty

3.8%

Total population with an independent living difficulty, 2023

Disability Characteristics

11%

Total population with a disability, 2023

7.8%

Child population with a disability, 2023

♦ = less than 20 cases. Please see data notes at end of report for more information on the significance of small numbers.

Healthcare and Health Outcomes : 2019 - 2023

Preterm Births

Asthma Related Emergency Department Visits, 2023*

Overdose Related Emergency Department Visits*

Naloxone Kits Distributed*

♦ = less than 20 cases. Please see data notes at end of report for more information on the significance of small numbers.
* = This data is ZIP codes that cover the Village of Cleves. The ZIP Code is: 45002

Economic Stability, 2023

The economic stability of individuals within a community can have a lasting impact on the overall health of that community. Economic stability means that individuals have sufficient and reliable income to pay for expenses such as healthcare. Lack of economic resources makes it more difficult for an individual to access healthcare and sustain healthy behaviors. There are a variety of metrics to look at that can measure the overall economic stability of a community such as unemployment rates, household income, rates of households receiving public benefits, and more.

Population 16 and Older
Unemployed

Households receiving SNAP benefits

Neighborhood & Built Environment, 2023

The built environment is the man-made space where individuals live, work, and play on a day-to-day basis. This includes buildings, parks, sidewalks, streets, public transportation and other spaces that have been created or modified. It can affect the potential for injuries related to pedestrian and motor vehicle crashes. It can also affect an individual's access to healthy food, recreation opportunities and clean, safe places to work and play.

Motor Vehicle Crashes

0.9% Motor vehicle crashes involving a pedestrian or bicyclist ♦

25% Motor vehicle crashes involving a child or teenager

4.1% Motor vehicle crashes involving drugs or alcohol ♦

0.0% Fatal motor vehicle crashes

0.43

94%

Households with internet access

0%

Youth 16-19 who are neither working nor in school

♦ = less than 20 cases. Please see data notes at end of report for more information on the significance of small numbers.

Assets & Opportunities

Assets

- Cleves Community Park promotes physical activity and social connectedness for residents.
- The percentage of households with a vehicle in Cleves is 5.7 times higher compared to other villages in Hamilton County.
- The percentage of children below the age of five in Cleves with an elevated blood lead level is 2.2 times lower than other villages in Hamilton County.
- The percentage of adults in Cleves with an independent living difficulty is 1.5 times lower than other villages in Hamilton County.
- Cleves provides residents with a variety of recreational amenities, including a basketball court, pickleball court, walking paths, soccer fields, and more.
- Three Rivers School District is a WeTHRIVE! school dedicated to supporting students' mental health, strengthening social-emotional learning, and fostering social connectedness, while also promoting the well-being of their staff.
- A prescription drug drop-off box is available in the municipal building, providing a secure option for safe drug disposal.

Opportunities

- There are currently no designated Safe Place locations displaying the Safe Place sign, the universal symbol of youth safety, in the community.
- The rate of people who are both disabled and uninsured in Cleves is 2 times higher than other villages in Hamilton County.
- The percentage of motor vehicle crashes in Cleves involving a child and/or teenager is 1.8 times higher than other villages in Hamilton County.
- The rate at which Cleves residents die from heart disease is 1.5 times higher than other villages in Hamilton County.
- There are no public parks in Cleves that are 100% tobacco free.
- There are currently no breast-feeding friendly spaces for residents within village-owned property.
- There are currently no idle free policies for village property.

Recommendations

The following recommendations are based on the assets and opportunities identified for your community. The corresponding WeTHRIVE! pathway or pathways for each recommendation are indicated to the right of each recommendation.

= Chronic Disease Pathway

= Injury Prevention Pathway

= Environmental Health Pathway

= Harm Reduction Pathway

= Emergency Preparedness Pathway

= Social Health Pathway

Recommendations	WeTHRIVE! Pathway
Collaborate with Lighthouse Youth Services and local community organizations and businesses to establish official Safe Place sites, providing teens with a secure location to seek help and safety.	 
Partner with Hamilton County Developmental Disability Services, local healthcare providers, nonprofit organizations, and insurance navigators to expand access to affordable healthcare resources for uninsured residents with disabilities. Strategies could include hosting enrollment assistance events, bringing the 513 Relief Bus to the community, and putting insurance information in main community locations.	 
Work with the Epidemiology team at HCPH to better understand where the crashes involving children or teenagers are occurring and the role youth have in the crash (i.e. driver vs passenger) to identify strategies to reduce the number of crashes.	
Partner with the American Heart Association to implement programs that raise awareness about heart disease and stroke. Emphasize chronic disease prevention through initiatives that promote physical activity, healthy eating, and overall heart health.	
Protect young lungs at play by working with Hamilton County Public Health or the American Heart Association to create policy around smoke-free or tobacco-free playgrounds or other outdoor community spaces owned by Clevs. After the policy is passed, install appropriate signage in the park.	 
Create a welcoming, breastfeeding-friendly space within village-owned property to ensure mothers have a safe and comfortable area to feed or pump. Once established, add signage and raise awareness among residents about the space.	
Improve air quality and the health of residents' lungs by implementing idle-free zones at all village-owned properties by partnering with Hamilton County ReSource and Southwest Ohio Air Quality.
